Welcome to Science!
Welcome to Science!

Aim: What are safe lab practices?

Do Now:

1. Please place signed Contract tear- offs in homework folder.
2. Describe your most interesting experience you have had in science lab.

Homework:
Create a lab safety poster. Be creative, include some of the most important safety rules we need to follow during lab work. Paper about 8 1/2 x 11". Illustrations, drawings are fine. Due Friday

Quiz Friday- Lab Safety

Due Monday (Living Environment): Summer Reading Journals on The Demon in the Freezer

Sep 9-11:41 PM

Lab Safety Rules

1. Follow all instructions given by the teacher.
2. Do not touch any equipment until instructed to do so.
3. Read the experiment before you begin it, and then read it again.
4. **TELL THE TEACHER IMMEDIATELY OF ANY INJURY OR BREAKAGE!**
5. Never eat or drink in the lab.
6. Never use mouth suction to extract liquids from lab equipment
7. Do not touch your face or other exposed skin after touching chemicals.
8. Pull back any loose hair from your face before beginning experiments or using microscopes.
9. Never force glass tubes into rubber stoppers because of the risk of breakage.
10. Wear lab aprons and gloves when required.
11. Always wear safety goggles if instructed
12. Use caution when using burners or heating plates in the lab.
13. Horseplay is ever allowed in a lab.
14. Be sure to turn off any equipment when you are done using it.
15. Always wipe surfaces clean after conducting experiments and throw away any & all trash. Always return all materials and equipment to its proper location.
16. **You will be dismissed from lab only when the teacher has determined your lab area clean**

Sep 10-12:18 AM
